### **WARNING:**

**This chemical is formulated  
for industrial use only**

Contact with skin or clothing or other improper handling or use of this product may result in bodily harm or other damage. Before using or mixing the contents with other substances, all labels applied to container, the applicable Technical Data Sheet and Material Safety Data Sheet should be read and specific instructions and precautions followed to assure correct use and personal safety.

# CLASSIQUE STRIP AS-3

## INTRODUCTION

CLASSIQUE STRIP AS-3 is an acid activated stripper containing phenol/cresol that will remove epoxy and polyester powder coatings, and virtually all coatings depending on substrate.

## SUMMARY OF OPERATING DATA

CLASSIQUE STRIP AS-3 is used as received at ambient temperatures. CLASSIQUE STRIP AS-3 can be sealed by adding water to top of tank to reduce evaporation.'

## OPERATIONAL RECOMMENDATIONS

CLASSIQUE STRIP AS-3 penetrates the paint layer and destroys the bond between the paint and the metal. It is particularly effective in removing powder coat and epoxies from aluminium.

Immersion time is dependent on the paint and substrate type.

A cold water pressure rinse can be used to remove loosened paint. Work can be placed back into the stripper tank after rinsing. Water will not affect CLASSIQUE STRIP AS-3.

Bath volume should be maintained to allow AS-3 to strip consistently.

PASSIVATOR 2 should be used in the rinse stage to stop flash rusting.

## EQUIPMENT

Stainless steel tanks are recommended, however polyethylene or polypropylene lined tanks can be used.

## TYPICAL PROPERTIES

Type	-Methylene chloride phenol/cresol formic acid type.
Appearance	-Brown Liquid
Specific Gravity	-1.22
